Morning Academic Camp

At Summer Discovery you create your own experience.
Build your day by choosing classes from core academics and electives.

Three Summer Discovery camps will be taught as two weeks sessions, each with a core academic theme. Camps meet each day from 8 a.m. to 11:45 a.m.

Session 1: Reading/Writing Discovery

June 15- June 26

Sample core classes—students takes two core classes for the session.

Journalism

Back by popular demand—Learn from an actual journalist who will teach the nuts and bolts of the newspaper business.

Creative Writing

Explore your creative side and learn to love writing.

Reading Comprehension

The focus of this class is on improving reading skills, comprehension and vocabulary, with lessons on writing, research, test-taking strategies and developing critical thinking skills.

Save The Planet/Reading and Writing Emphasis

This is a special course taught as a combined reading and writing course with specific focus on “saving the planet.” New reading and writing skills will teach you everything you need to know about our planet’s needs and how to preserve what we have for the future.

Session 2: Core theme: Math and Technology Discovery

June 29- July 10

Sample core classes-student takes two core classes for the session.

Math Rewind

Math Rewind is a class that includes practice and practical strategies can help students with homework and tests.

Word-Problem Solving

This class will take two weeks worth of mathematical word problems and teach students the steps they need to solve them. Everything from simple multiplication to more complex geometry and algebra will be covered.

Junior Programmers

Learn the inner workings computers and software and what it takes to write and test programs.

Save The Planet /Math & Computer Emphasis

This is a special course taught as a combined math and computer course with specific focus on “saving the planet.” Students will gather and analyze data then apply it to an environmental project.

Session 3: Science

July 13- July 24

Sample core classes-students takes two core classes for the session

Archeology

Learn about fossils and geologic time, as you explore the role of paleontologists in discovering our earth’s history.

General Science

Participate in various scientific activities to learn about the process of scientific inquiry.

Biology

Learn about the basic parts of a microscope and an overview of the proper procedures for using them. Complete labs in our state of the art science room to learn more about the world of biology, including cell structure, cell function, scientific studies, plants, vertebrates, invertebrates and other life science topics.

Save The Planet/Science Emphasis

This is a special course taught as a two hour science course with specific focus on “saving the planet.”

Summer Discovery Electives

Students choose one elective class to round out their academic day. Sample electives include:

Rock Band

Led by a professional musician, you will learn everything you need to know about starting your own band, writing your own music and creating your own CD.

Law Enforcement

Learn about the inner workings of law enforcement, taught by a police officer. Understand how the law works, your rights, the penal system, the courts, and overall justice.

Summer Stock

Develop your acting talent through summer stock. Learn what it takes to be a theater actor. Understand all aspects of the theater where everything is LIVE.

Astronomy and More

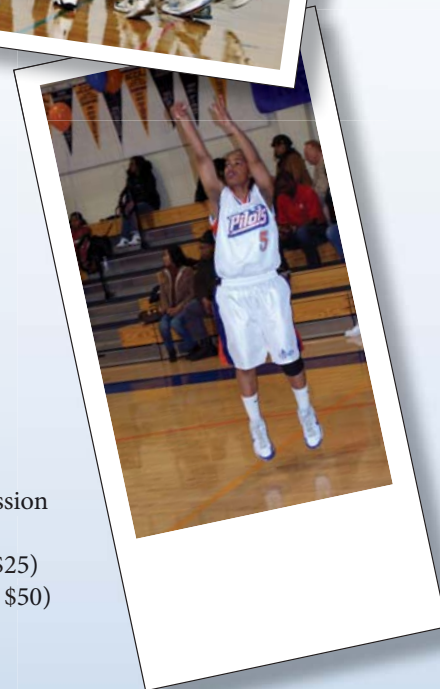

Explore the beauty of the sky. Discover the constellations as well as the legends behind them. Conclude the course with a field trip to Chabot Space and Science Center.

Center Court Camps for students in 4th to 9th grade
